PROFESSIONAL SUMMARY

Computer Science graduate from the University of Malakand, Pakistan, with practical experience designing and building AI powered applications across legal tech, browser productivity tools, education technology, and business automation. Comfortable working with Large Language Models, conversational AI workflows, and API integrations to deliver functional, end to end software solutions. Seeking a full time role as an AI Application Developer or AI focused Software Developer.

EDUCATION

BS Computer Science, University of Malakand, Pakistan *2022 - 2026*

Final Year Project: LexBot, an AI powered legal assistance platform.

PROFESSIONAL PROJECTS

LexBot, AI Powered Legal Assistance Platform

- Designed and built an AI powered legal assistance application with a conversational interface.
- Integrated LLM capabilities for intelligent, context aware user interaction.
- Developed conversational workflows to process user queries and generate contextual responses.
- Applied AI orchestration concepts to connect application logic, user interaction, and model responses.
- Delivered the project as a functional end to end software solution.

OmniLayer AI, AI Powered Chrome Extension

- Built a browser based AI assistant for summarizing and understanding web content.
- Designed the extension to deliver contextual AI assistance directly inside the browser.
- Explored additional AI powered productivity and content assistance features.

ZYRA, AI Based Examination Monitoring Platform

- Designed and built an AI based platform to help identify suspicious activity during examinations.
- Applied AI oriented approaches to improve examination integrity for an education technology use case.

Restaurant AI Chatbot

- Built a conversational AI chatbot for restaurant customer interaction and query handling.
- Applied conversational AI to a real world business automation use case.

TECHNICAL SKILLS

Artificial Intelligence: Generative AI, Large Language Models, Conversational AI, Prompt Engineering, AI Orchestration, AI Automation

AI Applications: AI Chatbots, AI Assistants, Text Summarization, Content Understanding, Intelligent Monitoring, Customer Support Automation

APIs and Integration: API Integration, LLM API Integration, Third Party API Integration, REST API Concepts

Software Development: Web Application Development, Chrome Extension Development, Product Prototyping, Debugging, Iterative and AI assisted Development

CERTIFICATIONS & TRAINING

- NAVTTC Certified AI Training, AI Skill Bridge
- ACT AI Course, sponsored by HEC and NAVTTC, conducted through AI Skill Bridge

ADDITIONAL EXPERIENCE

Volunteer and trained participant with SPADO, the British Council, and Education Above All, developing teamwork, cross cultural communication, and community engagement skills relevant to collaborative, multicultural work environments.

PROFESSIONAL STRENGTHS

Problem solving, analytical and product thinking, adaptability, research orientation, fast self-learning, communication, and team collaboration.
